

r27.1.3 Changelog

+-----+
| r27.1.3 Release - 180975 |
+-----+

Release day February 28th 2024

Improvements

- DSOF-26139 - Changed the wording of "Replace with another Mapping" button to "Replace with selected Mapping", and a tooltip with further explanation has been added to video layers

Fixes

- DSOF-22638 - Fixed a video memory leak when mapping/unmapping video inputs
- DSOF-24199 - Fixed a hang that could occur on shutdown due to in-flight HTTP requests
- DSOF-24760 - Fixed an issue where object tracking mode for camera focus distance did not account for object hierarchy
- DSOF-25317 - Fixed occurrences of `toFree.addr4 != 0` error messages when using RenderStream
- DSOF-26140 - Fixed an issue when key-framed, Mapping Replacement names only updated after refresh of layer
- DSOF-26168 - Stage Render Layer - Fixed an issue where screens in 'Frontplate' layer mapped to the backplate showed up red
- DSOF-26339 - Fixed an issue where Dynamic Soft Edge did not affect Actors in session
- DSOF-26361 - Fixed an issue where the 'Find/replace usages' widget did not have a scrollbar when it extended offscreen
- DSOF-26377 - Fixed a shader errors being thrown when using radial mapping
- DSOF-26410 - Fixed an Access Violation using Blur layer
